

Table 1: Dengue status of 770 dengue suspected cases based on time of serum collection and dengue ELISA results

Category (n)	Number of cases (%)	Dengue status
Post acute phase serum (620)		
IgM positive only	134 (22)	primary dengue
IgM and IgG positive	273 (44)	current primary or secondary
IgG only positive	249 (41)	current secondary or past dengue infection
IgM and IgG negative	80 (13)	dengue antibody negative
Acute phase serum (150)		
IgM positive only	14 (9)	primary dengue
IgM and IgG positive	48 (32)	current primary or secondary
IgG only positive	52 (35)	current secondary or past exposure
IgM and IgG negative	36 (24)	dengue antibody negative
